THE GOBELIN
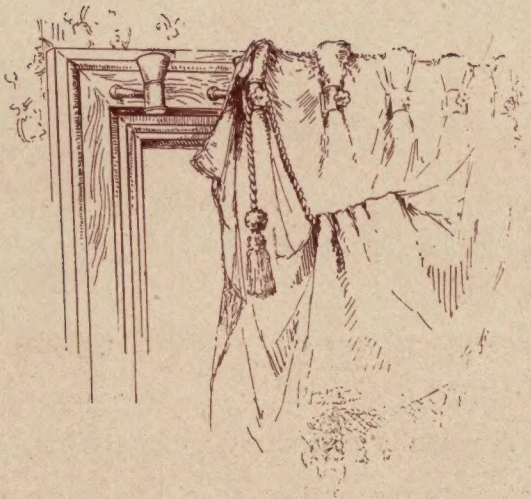
CURTAIN FIXTURE.

The most artistic and novel method of hanging draperies. It is a new invention, taking the place of cornices, poles, etc., and is in every way superior to all other fixtures for suspending curtains and draperies.

In the way of simplicity, durability and artistic appearance, they are unexcelled.

The success attending the sale of these fixtures is evidence of their superior character, and the class of trade now buying them speak very highly of their excellence.

The dealer can carry a complete line of these Fixtures on less than one-fourth the capital of any other style of curtain fixtures.



Patent allowed.

INSTRUCTIONS FOR PUTTING UP.

In putting up the Fixtures you place them from six to eight inches apart, according to the width of the window or door. Always use odd number. They are packed in sets of seven, as that is the number usually employed. Should the wood-work be very fine, the Fixture can be attached to a pine slat about one inch square and with two screws on either end fastened securely to the frame work of the window. After the Fixtures are in position you take the drapery or curtain and arrange according to the design to be produced, and push the clasp over the goods and around the Fixture one at a time.

NO POLES,

NO RINGS,

NO PINS.

Curtains and draperies, when hung with the Gobelin Fixture, present a most artistic and stylish appearance.

Draperies of all weight, from the finest laces to the heaviest portiers, can be hung with the Gobelin Fix-

ture, and be more secure than those put up on poles or cornices.

The Gobelin Fixture does not damage the fabric, as is the case with pins and sewing on hooks or rings. They can also be taken down and stored

away with greater ease and less storage-room than either poles or cornices.

The Gobelin Curtain Fixture is everlasting.

The Gobelin Curtain Fixture can be taken from one window or door to another

and used as if new; but poles if too long, must be sawed, and if too short, would be useless.

Curtains can be re-draped in a few minutes by using the Gobelin Fixture; doing this does not injure the fabric as is the case with pins and hooks.

The Gobelin Fixture can be fitted to any door or window. No measurements necessary. No sawing poles; hence, a great saving of time for the draper.

The Gobelin Fixture leaves no remnants in stock as a loss

to the dealer. No waste, no warping, which is a great superiority over poles.

The Gobelin Fixture is adapted to hanging draperies on any style of bay window, either square or circular; arch-ways, niches, bed canopies, etc.

Poles for all these must be made to order at extra cost.

Can be used for draping doors which can be opened with drapery attached.

It requires less than half the time and labor to put up the

Gobelin Fixture and hang curtains.

The curtains can be draped in a very artistic manner, and so easy that it is a pleasure. Any kind of a curtain or fabric can be hung, and for

over-draperies it is unsurpassed.

The manufacturers of the Gobelin Curtain Fixtures have for beauty, finish and durability, reached perfection in a device for hanging draperies.
